Re: John P. Saad Waste Oil Company

Dear John:

Please find enclosed analytical data from the million gallon storage tank at Smyrna Airport which contains some of the Saad company's waste liquids. I intended to get this material to you earlier but apparently overlooked it.

You will note that the May 16th letter and accompanying data sheet indicate that the material might be used for dust control. However, a few days later I received a copy of the additional "general laboratory report" and it showed that the material in the tank included many solvents which I felt should not be dumped wantonly into the environment.

I would appreciate any opinions or interpretations of this data which you might submit. The material is still being held in the tank pending further analysis. Please be advised that I am terminating my employment with the Division of Water Quality Control at the end of this week. Any further correspondence from your office regarding John P. Saad should be addressed to Mr. Barry W. Sulkin, who will henceforth be working with this project.

Sincerely,

A handwritten signature in dark ink, appearing to read "Joe", is written over the typed name.

Joseph H. Rossman, Chief
Nashville Basin Office
Tennessee Water Quality Control Division
